PRESS RELEASE - FOR IMMEDIATE RELEASE

OMEGA ANNOUNCES SECOND QUARTER 2007 FINANCIAL RESULTS AND SECOND QUARTER ADJUSTED FFO OF \$0.34 PER SHARE

TIMONIUM, MARYLAND – July 26, 2007 – Omega Healthcare Investors, Inc. (NYSE:OHI) today announced its results of operations for the quarter ended June 30, 2007. The Company also reported Funds From Operations ("FFO") available to common stockholders for the three months ended June 30, 2007 of \$22.4 million or \$0.33 per common share. The \$22.4 million of FFO available to common stockholders for the quarter includes \$0.3 million of non-cash restricted stock expense and \$0.1 million of non-cash consolidation adjustments due to Financial Accounting Standards Board Interpretation No. 46R, Consolidation of Variable Interest Entities ("FIN 46R"). FFO is presented in accordance with the guidelines for the calculation and reporting of FFO issued by the National Association of Real Estate Investment Trusts ("NAREIT"). Adjusted FFO was \$0.34 per common share for the three months ended June 30, 2007. Adjusted FFO is a non-GAAP financial measure, which additionally excludes the impact of certain non-cash items and certain items of revenue or expenses, including: restricted stock expense and FIN 46R consolidation adjustments. For more information regarding FFO and adjusted FFO, see the "Funds From Operations" section below.

GAAP NET INCOME

For the three-month period ended June 30, 2007, the Company reported net income of \$16.1 million, net income available to common stockholders of \$13.6 million, or \$0.20 per diluted common share and operating revenues of \$38.2 million. This compares to net income of \$17.5 million, net income available to common stockholders of \$15.0 million, or \$0.26 per diluted common share, and operating revenues of \$32.3 million for the same period in 2006.

For the six-month period ended June 30, 2007, the Company reported net income of \$36.7 million, net income available to common stockholders of \$31.7 million, or \$0.50 per diluted common share and operating revenues of \$80.8 million. The increases in net income, operating revenues and net income available to common stockholders during the six-month period ended June 30, 2007 were due primarily to \$200 million in new investments made throughout 2006, as well as, the impact of an allowance adjustment of \$5.0 million, or \$0.8 per common share, with respect to straight-line rent recognition recorded in the first quarter of 2007.

(1) Includes amounts in discontinued operations

This press release includes Funds From Operations, or FFO, which is a non-GAAP financial measure. For purposes of the Securities and Exchange Commission's ("SEC") Regulation G, a non-GAAP financial measure is a numerical measure of a company's historical or future financial performance, financial position or cash flows that excludes amounts, or is subject to adjustments that have the effect of excluding amounts, that are included in the most directly comparable financial measure calculated and presented in accordance with GAAP in the statement of operations, balance sheet or statement of cash flows (or equivalent statements) of the company, or includes amounts, or is subject to adjustments that have the effect of including amounts, that are excluded from the most directly comparable financial measure so calculated and presented. As used in this press release, GAAP refers to generally accepted accounting principles in the United States of America. Pursuant to the requirements of Regulation G, the Company has provided reconciliations of the non-GAAP financial measures to the most directly comparable GAAP financial measures.

The Company calculates and reports FFO in accordance with the definition and interpretive guidelines issued by the National Association of Real Estate Investment Trusts ("NAREIT"), and consequently,

FFO is defined as net income available to common stockholders, adjusted for the effects of asset dispositions and certain non-cash items, primarily depreciation and amortization. FFO available to common stockholders per share is further adjusted for the effect of restricted stock awards and the exercise of in-the-money stock options. The Company believes that FFO is an important supplemental measure of its operating performance. Because the historical cost accounting convention used for real estate assets requires depreciation (except on land), such accounting presentation implies that the value of real estate assets diminishes predictably over time, while real estate values instead have historically risen or fallen with market conditions. The term FFO was designed by the real estate industry to address this issue. FFO herein is not necessarily comparable to FFO of other real estate investment trusts, or REITs, that do not use the same definition or implementation guidelines or interpret the standards differently from the Company.

Adjusted FFO is calculated as FFO available to common stockholders less one-time revenue and expense items. The Company believes that adjusted FFO provides an enhanced measure of the operating performance of the Company's core portfolio as a REIT. The Company's computation of adjusted FFO is not comparable to the NAREIT definition of FFO or to similar measures reported by other REITs, but the Company believes it is an appropriate measure for this Company.

The Company uses FFO as one of several criteria to measure the operating performance of its business. The Company further believes that by excluding the effect of depreciation, amortization and gains or losses from sales of real estate, all of which are based on historical costs and which may be of limited relevance in evaluating current performance, FFO can facilitate comparisons of operating performance between periods and between other REITs. The Company offers this measure to assist the users of its financial statements in analyzing its performance; however, this is not a measure of financial performance under GAAP and should not be considered a measure of liquidity, an alternative to net income or an indicator of any other performance measure determined in accordance with GAAP. Investors and potential investors in the Company's securities should not rely on this measure as a substitute for any GAAP measure, including net income.

In February 2004, NAREIT informed its member companies that it was adopting the position of the SEC with respect to asset impairment charges and would no longer recommend that impairment write-downs be excluded from FFO. In the tables included in this press release, the Company has applied this interpretation and has not excluded asset impairment charges in calculating its FFO. As a result, its FFO may not be comparable to similar measures reported in previous disclosures. According to NAREIT, there is inconsistency among NAREIT member companies as to the adoption of this interpretation of FFO. Therefore, a comparison of the Company's FFO results to another company's FFO results may not be meaningful.
