PRESS RELEASE – FOR IMMEDIATE RELEASE

**OMEGA ANNOUNCES SECOND QUARTER 2012 FINANCIAL RESULTS;
ADJUSTED FFO OF \$0.53 PER SHARE FOR THE SECOND QUARTER**

HUNT VALLEY, MARYLAND – July 27, 2012 – Omega Healthcare Investors, Inc. (NYSE:OHI) (the “Company” or “Omega”) today announced its results of operations for the three- and six-month period ended June 30, 2012. The Company also reported Funds From Operations (“FFO”) available to common stockholders for the three-month period ended June 30, 2012 of \$55.8 million or \$0.53 per common share. The \$55.8 million of FFO available to common stockholders for the second quarter of 2012 includes a \$1.7 million gain related to interest refinancing costs, \$1.5 million of non-cash stock-based compensation expense and \$0.1 million of acquisition related costs. The \$1.7 million interest refinancing costs adjustment (gain) is related to the write-off of the remaining fair market value debt adjustment on four HUD mortgage loans that the Company paid off in June 2012. FFO is presented in accordance with the guidelines for the calculation and reporting of FFO issued by the National Association of Real Estate Investment Trusts (“NAREIT”). Adjusted FFO was \$0.53 per common share for the three-month period ended June 30, 2012. FFO and Adjusted FFO are non-GAAP financial measures. Adjusted FFO is calculated as FFO available to common stockholders excluding the impact of certain non-cash items and certain items of revenue or expense, including, but not limited to: expenses associated with the retirement of HUD loans, acquisitions and stock-based compensation expense. For more information regarding FFO and Adjusted FFO, see the “Second Quarter 2012 Results – Funds From Operations” section below.

GAAP NET INCOME

For the three-month period ended June 30, 2012, the Company reported net income and net income available to common stockholders of \$30.6 million, or \$0.29 per diluted common share, on operating revenues of \$83.8 million. This compares to net income and net income available to common stockholders of \$17.8 million, or \$0.17 per diluted common share, on operating revenues of \$72.6 million, for the same period in 2011.

For the six-month period ended June 30, 2012, the Company reported net income and net income available to common stockholders of \$56.7 million, or \$0.54 per diluted common share, on operating revenues of \$168.3 million. This compares to net income of \$11.9 million and net income available to common stockholders of \$6.7 million, or \$0.07 per diluted common share, on operating revenues of \$143.1 million, for the same period in 2011.

The year-to-date increase in net income was primarily due to the impact of: (i) additional rental income and mortgage interest income associated with approximately \$370 million of new investments made since July 1, 2011; (ii) \$7.3 million in gains on the sale of assets, (iii) \$24.7 million net decrease in real estate impairments and (iv) \$4.1 million net decrease in provision for uncollectible accounts receivable. These increases were partially offset by: (i) \$4.4 million of increased depreciation expense associated with the new investments; (ii) \$6.9 million of increased interest expense primarily associated with financing the new investments; and (iii) \$5.4 million in increased interest refinancing costs relating to (a) a \$7.1 million charge associated with the tender and redemption of all of the Company’s outstanding \$175 million of 7% Senior Notes due 2016 in March 2012, partially offset by (b) a \$1.7 million interest refinancing expense adjustment (gain) related to the write-off of the remaining fair market value debt adjustment on four HUD mortgage loans that the Company paid off in June 2012.

The Company's Adjusted FFO guidance is based on a number of assumptions, which are subject to change and many of which are outside the Company's control. If actual results vary from these assumptions, the Company's expectations may change. Without limiting the generality of the foregoing, the timing and completion of acquisitions, divestitures, capital and financing transactions, and variations in restricted stock amortization expense may cause actual results to vary materially from our current expectations. This press release includes Funds From Operations, or FFO, which is a non-GAAP financial measure. For purposes of the Securities and Exchange Commission's Regulation G, a non-GAAP financial measure is a numerical measure of a company's historical or future financial performance, financial position or cash flows that excludes amounts, or is subject to adjustments that have the effect of excluding amounts, that are included in the most directly comparable financial measure calculated and presented in accordance with GAAP in the statement of operations, balance sheet or statement of cash flows (or equivalent statements) of the company, or includes amounts, or is subject to adjustments that have the effect of including amounts, that are excluded from the most directly comparable financial measure so calculated and presented. As used in this press release, GAAP refers to generally accepted accounting principles in the United States of America. Pursuant to the requirements of Regulation G, the Company has provided reconciliations of the non-GAAP financial measures to the most directly comparable GAAP financial measures.

The Company calculates and reports FFO in accordance with the definition and interpretive guidelines issued by the National Association of Real Estate Investment Trusts ("NAREIT"), and consequently, FFO is defined as net income available to common stockholders, adjusted for the effects of asset dispositions and certain non-cash items, primarily depreciation and amortization and impairments on real estate assets. The Company believes that FFO is an important supplemental measure of its operating performance. Because the historical cost accounting convention used for real estate assets requires depreciation (except on land), such accounting presentation implies that the value of real estate assets diminishes predictably over time, while real estate values instead have historically risen or fallen with market conditions. The term FFO was designed by the real estate industry to address this issue. FFO described herein is not necessarily comparable to FFO of other real estate investment trusts, or REITs, that do not use the same definition or implementation guidelines or interpret the standards differently from the Company.

The Company uses FFO as one of several criteria to measure the operating performance of its business. The Company further believes that by excluding the effect of depreciation, amortization, impairments on real estate assets and gains or losses from sales of real estate, all of which are based on historical costs and which may be of limited relevance in evaluating current performance, FFO can facilitate comparisons of operating performance between periods and between other REITs. The Company offers this measure to assist the users of its financial statements in analyzing its performance; however, this is not a measure of financial performance under GAAP and should not be considered a measure of liquidity, an alternative to net income or an indicator of any other performance measure determined in accordance with GAAP. Investors and potential investors in the Company's securities should not rely on this measure as a substitute for any GAAP measure, including net income.

Adjusted FFO is calculated as FFO available to common stockholders excluding the impact of non-cash stock-based compensation and certain revenue and expense items identified above. The Company believes that Adjusted FFO provides an enhanced measure of the operating performance of the Company's core portfolio as a REIT. The Company's computation of Adjusted FFO is not comparable to the NAREIT definition of FFO or to similar measures reported by other REITs, but the Company believes it is an appropriate measure for this Company.

The Company currently expects its 2012 Adjusted FFO available to common stockholders to be between \$2.12 and \$2.15 per diluted share. The following table presents a reconciliation of our guidance regarding 2012 FFO and Adjusted FFO to net income available to common stockholders:

2012 Projected Adjusted FFO
